EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ernest Beffel on September 22, 2006.

The application has been amended as follows:

Cancel Claims 29-55.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: The prior art of record does not provide for, nor suggests providing for a removable listening device to monitor a wired communications channel between one or more tool hosts and one or more tools, recording report and report trigger definitions sent by the tool hosts to the tools, matching a first triggered report from the tools with the report and trigger definitions to generate a context-insensitive report and outputting the context-insensitive report in a field tagged format. The Applicant has defined a "context-insensitive report" as "a report which can be interpreted without reference to the report definition" as evidenced by copending application now patent 7,072,985, cols. 3-11 as is used in this application. The device receives both report triggers from the hosts and reports from the tools which require the report trigger definitions in order to interpret the reports (as shown in the specification, pages 11-13, and matches both up and outputs the data in a field tagged format, such as XML or HTML as applied in the application (see pages 13-15). The closest prior art of record would be the most recent rejection, Coss in view of George, in view of Walker, however one of ordinary skill in the art would not find it obvious to split the report generator of Coss into two parts, since the report generator both defines the reports, and then generates the field-tagged format, and it would not be obvious to put the report generator part on a removable listening device. The combination of Coss-Walker-George does not provide the actual recording of the report trigger definitions, since Coss actually generates the report trigger definitions, it cannot

be able to record them. The report and report trigger definitions are required to be in a protocol which can be interpreted by both the host and tool, and the context-insensitive report must be in a protocol and format which can be interpreted by other computers. For the above reasons, in conjunction with the other limitations of the independent claims, puts this case in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph E. Avellino whose telephone number is (571) 272-3905. The examiner can normally be reached on Monday-Friday 7:00-4:00.
